

TRANSFORMATIVE TECHNOLOGY

Amongst the most transformative technologies in the world today are Professional AudioVisual (Pro-AV) technologies and Integrated Experience Solutions. By enhancing what people see, hear and experience, businesses are finding more impactful and effective ways of communicating information, branding, engagement, marketing, wayfinding. The latest in dynamic digital and XR displays, 3D simulations, collaborative conferencing, command and control centers and multi-sensory experiences are re-defining the future of businesses everywhere.

A SHOW OF INNOVATION FOR SOUTHEAST ASIA

This May, immerse yourself in the latest Pro-AV and Integrated Experience Solutions at InfoComm Southeast Asia. Organized in Bangkok - which is one of the most exciting, exotic and accessible travel destinations in the world, over 150 exhibiting companies from around the world are congregating under one roof to share their innovations. Visitors will also get to attend free learning sessions which are a hallmark of all shows by event organizer InfoCommAsia.

This is also where we have chosen to share our expertise. Visit our booth and explore our latest products and technologies. Dive deep into understanding how our solutions can give you an edge in the future.

SEE YOU AT INFOCOMM SOUTHEAST ASIA 2019.
